## **DETAILED ACTION**

### ***Claim Rejections - 35 USC § 112***

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

Claim1 is rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the enablement requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to enable one skilled in the art to which it pertains, or with which it is most nearly connected, to make and/or use the invention. Specification does not disclose that “wherein said second diffusion region is common to light beams coming from the plurality of light sources, and wherein the plurality of light sources are shifted from a plane, which is normal to a surface of the diffusion region and pass through a center of the first diffusion region in a width direction, in a direction perpendicular to the longitudinal direction” as recited by claim 1. Therefore the application has not been examined on its merits.
